Sports Analytics

Net Neutrality

## PROJECTS

### IS A UNIVERSITY EDUCATION WORTH THE INVESTMENT? |

DATA ANALYSIS, R, DATABASES

2019

Course project for Intro to Data Science. Practiced data analysis, visualisations, hypothesis testing and predictive modelling in R, earning 100% on the final presentation given to a jury of Computer Science and Statistics professors.

### VAULT | PYTHON, MYSQL, DATABASES

2019 | github.com/H-Richard/vault

Personal group project. Program that generates and stores passwords powered by python and MySQL. Uses MySQL Connector for CRUD operations. Revision using Github.

### MUSIC SEQUENCER | C, DATA STRUCTURES

2019

Course project for Intro to CS II (CSCA48). Program that stores, organizes and allows a user to manipulate musical notes, based on Binary Search Trees.

### THE BRIDGE HACK | DATA ANALYSIS, R

2019

Hackathon. Cleaned, analyzed and made visualisations with large data sets to present a proposal in order improve UofT's Varsity sports attendance. Rated by judges from a non mathematical background, winning a \$200 cash prize.

### FOOD NETWORKS | C, RECURSION, DATA STRUCTURES

2019

Course project for Intro to CS II. Program that stores and organizes ingredients in a Binary Search Tree, then uses recursion to suggest ingredients for a recipe.

### PERSONAL WEBSITE | HTML5, CSS

2019 | owenbc44.github.io

Minimal website featuring a short description of its creator, a resume download link and some contact information. Currently working on implementing a projects page.

### SPACE INVADER | PYTHON, PYGAME

2018

High school group project. Recreating the classic space invader game in python using the pygame library.
